

Lead Funnel Blueprint

Build a System That Attracts Leads,
Nurtures Trust, and Converts to Sales - On Autopilot

*Your best salesperson works 24/7, never complains, and costs a fraction of hiring.
That salesperson is your funnel. This blueprint shows you how to build it.*

What a Lead Funnel Actually Is

A lead funnel is the journey from stranger to paying customer. Most businesses lose people at every stage because there is no deliberate path - just a website and a hope. A real funnel is engineered. Every step has one job.

The 4 Stages of Every Funnel

Awareness: They discover you exist (social media, SEO, referral, ads).

Interest: They engage with your content and want to know more.

Decision: They are considering buying - comparing, evaluating, hesitating.

Action: They buy, book, or sign up.

Most businesses only work on Awareness and Action - and wonder why conversion is low. This blueprint builds all 4 stages.

Lead Magnet Ideas

A lead magnet is the free thing you give in exchange for an email address. It must be valuable enough to trade personal contact info for.

10 Lead Magnet Formats That Work

1. Checklist: '10-Point Checklist to [Achieve Result]' - fast to consume, high perceived value.
2. Swipe File: Templates, scripts, or copy examples they can use immediately.
3. Mini Guide: A focused PDF solving one specific problem in 5-10 pages.
4. Email Course: 5-day email sequence teaching a skill or concept step by step.
5. Free Tool / Calculator: Interactive resource that gives personalized output.
6. Webinar / Workshop: Live or recorded training that positions you as an expert.
7. Case Study: 'How [Client] Achieved [Result]' - proof-based lead magnet.
8. Quiz / Assessment: 'What Type of [X] Are You?' - high engagement, personalized results.
9. Free Consultation: 20-30 minutes of your expertise in exchange for their contact info.
10. Resource Library: Collection of templates, tools, or guides in one place.

Choosing the Right Lead Magnet

- It must solve a real, immediate problem your ideal customer has RIGHT NOW.
- It must be consumable in under 15 minutes (except for courses and webinars).
- It must relate directly to what you sell - not a random topic.
- It must deliver a quick win that makes them want more from you.

Landing Page Structure

Your lead magnet needs a dedicated landing page. A homepage does not convert leads - a focused page does.

The 6-Element Landing Page

1. **Headline:** The specific result they get. 'Get the [Lead Magnet Name] - Free'.
2. **Subheadline:** Who it is for and the core promise in one sentence.
3. **Visual:** Mockup of the guide, screenshot, or relevant image.
4. **Bullet Benefits:** 3-5 bullets of exactly what they will learn or get.
5. **Form:** Name and email. Nothing more.
6. **CTA Button:** 'Send Me the [Guide/Checklist/Template]' - specific beats generic.

Remove navigation menus from your landing page. Every link is an exit. Keep them focused on one action.

5-Part Email Nurture Sequence

After they opt in, your email sequence does the selling. This sequence converts leads to buyers over 5-7 days.

Email 1 - Immediate Delivery (Day 0)

Subject: Your [Lead Magnet Name] is here!

Body: Deliver the resource. Set expectations for what comes next. Keep it short.

Email 2 - The Story (Day 1)

Subject: Why I almost gave up on [topic]...

Body: Share a personal story about the problem they face. Build connection and relatability.

Email 3 - The Education (Day 2-3)

Subject: The [method/framework] that changed everything

Body: Teach something valuable. Position your product as the next logical step.

Email 4 - Social Proof (Day 4)

Subject: How [Name] went from [before] to [after]

Body: Share a client result or case study. Let results do the persuasion.

Email 5 - The Offer (Day 5-7)

Subject: Ready to [achieve result]? Here is how I can help.

Body: Make your offer. Be direct. State the benefit, the price, and what to do next.

Conversion Optimization Tactics

What to Test First

- Headline: Test 2 variations. The headline alone can move conversion by 30-50%.
- CTA Button Color: Contrasting colors outperform blended ones.
- Form Length: Shorter forms almost always convert better.
- Social Proof Placement: Move testimonials above the fold and test conversion rate.
- Lead Magnet Name: 'Free Guide' vs 'The [Specific] Blueprint' - specific names win.

Benchmarks to Track

- Landing page conversion rate: 25-40% is healthy. Under 15% = fix the headline first.
- Email open rate: 30-50% for a fresh list. Below 20% = test subject lines.
- Email click rate: 5-10% is solid. Below 2% = the offer or copy needs work.
- Sales conversion rate: 1-3% of email list buying is typical. Above 5% is excellent.
